Ben and Sherry Andrews

Anne and Frank Taylor

We are a forage-based, low input Angus seedstock producer. It is our objective to help you achieve a more profitable operation and reduce everyday wear and tear. To do this, we use the Timeless Genetics© of Emulation, Wye, Rito, and Traveler to breed registered black Angus cattle that meet the needs of today's producer.

One of the measures of our program's success is that our commercial calves-registered calves that we determine not to include in our herd or sell as registered seedstock--regularly top commercial sales year after year. This year was no exception. We topped the Nebraska state-wide market the week of our sale. One of the purchasers remarked: "I come back year after year, because I never lose money on your calves. They explode when I put them on feed, and I don't have any problems with them."

The Bulls. This sale features sons of great SVR bulls and of some of the greatest Angus sires of all time: RR Rito 707; F0203; OCC Eureka 865E; Emulation N Bar 5522; EXT; Sinclair Express 6V47; Adelard, Alap, Bear, Contact and Federal of Wye, and Paramount Ambush 2172. The bulls' mothers are outstanding.

The bulls were bred to thrive on the range and on forage. We developed them slowly and only on forage to promote proper skeletal and muscular development. They aren't hiding behind fat and tons of feed. They will last. We want our bulls to thrive on the range, and not "melt" as "finished" bulls so often do. Customers often tell us that our bulls gain weight during breeding season.

SVR bulls transmit structural soundness, fertility, superior teats and udders, functionally low birth weight, balanced growth and outstanding carcass quality. They transmit traditional Angus maternal goodness.

These two-year-olds have the proper phenotype, promise calving ease, and have excellent dispositions. They will stamp your calves, assuring uniformity in your calf crop.

By the time our bulls are ready for sale as coming two-year-olds, we have evaluated them for libido, fertility, good temperament, physical ability, soundness, and carcass quality. By taking time to develop them properly, we are confident in their ability to pass these essential traits into your herd. In fact, we would use any of these bulls as our herd sires.

Bulls are best viewed either in person or when they are moving. You can see the bulls at our ranch (directions are provided at www.svr-angus.com), at the Burwell Livestock Market one day prior to Sale Day, or online at www.superiorlivestock.com. SVR's log-in page for viewing the bulls and bidding is: <http://superiorlivestock.com/production-event-detail?id=1787>. Copy and paste either Superior link into your internet browser and hit Return.

If you would prefer a CD of the bulls, please call or email us, and we'll send one to you. You can also view the bulls on our website, www.svr-angus.com.

Please visit www.svr-angus.com to learn about our program and see our Herd Bulls, the AI sires and our Foundation Females. You can also watch The American Rancher program that featured our ranch, its history and the history of the Nebraska Sandhills.

Selection Process. We strictly, rigorously and regularly score our animals.

Mothers. We begin with the mother cows, the foundation of traditional Angus genetics. We do NOT select entirely by the numbers. We cull females that have poor dispositions, poor legs and feet, inferior teat and udder structure and low quality milk.

Our cows must maintain excellent fertility and be long-lived. They must be phenotypically correct, feminine and angular, so they calve easily. They must feed their calves properly and cover large amounts of country during the summer. We strive for a mother cow that can wean a calf of at least 50% of her body weight.

The Sires. Our AI and herd sires must be masculine and breed with vigor. They must sire outstanding animals that have excellent carcass quality, proper phenotype, quiet dispositions and pass on superior genetics. Although we stress maternal genetics, we keep herd bulls that sire excellent males **and** females, and pass on the best traits of the traditional Angus animal. We strive to produce bulls that sire uniform calf crops.

The Calves. At birth, each calf is tagged, weighed and handled on foot. The mother cannot be overly defensive and it cannot run away. The calf must get up and suck on its own quickly. The cow needs to pair up and take her calf when pairing out. If the mother and the calf do not meet these criteria, they are culled.

To aid in our selection process, we also “sample” our calves. They consistently grade “choice” - on grass and forage alone. If a particular type of mating can't meet that objective, we do not continue that breeding.

Final Selection. There are two final steps in the selection process. All our animals must be easy to handle. We will not tolerate animals that are difficult to handle, regardless of any other characteristics. The environment makes the final cut. If an animal can't make it on our native grass, supplemented with salt and mineral, then the environment has culled that animal from our herd.

Breeding. The Angus animal can be adapted to many different environments. Recently, it has been used for beef production and has been heavily fed. That is not the typical ranch environment, so we went back in time to find genetics that worked in a range and forage environment. We're creating a herd based upon older genetics that works on grass.

We examined the relevant EPDs. We studied the great, old herds. We asked old-time, great Angus breeders; What is the one bull that you wished you had used more in your herd that produced animals that functioned extraordinarily well on the range and on forage? (Of course, we asked other questions.) The answers were readily forthcoming, and we learned how to incorporate those genetics into our herd.

Each year we offer bulls sired by great sires from many years ago. These sires are proven, their breeders know what worked, and we have their history. Simply put, they come from eras when they had to thrive on forage alone.

For this sale, we chose a unique battery.

Dale and Betty Davis bred **RR Rito 707** in their famous Rollin' Rock herd. Although he needs no introduction, he was the top yearling weight bull and the top-gaining bull with a gain ratio of 129 in the 1968 PIC Bull Test. He recorded an individual weaning ratio of 118 and an individual yearling ratio of 123. His first progeny test group of 27 steers recorded an average daily gain ratio of 111 and graded choice. His dam, Eriskay of Rollin Rock, recorded an individual weaning ratio of 108 on six calves, a progeny gain ratio of 112 on five head and a progeny yearly ratio of 112 on five head, all prior to AHIR. His Weaning Weight EPD is nearly 40 pounds greater than the estimated average of his birth year and his Yearling Weight EPD is 70 pounds greater.

Rito 707's son, **PBC 707 1M F0203**, was the most noteworthy achievement of Pioneer Beef Cattle. **F0203's** fame developed years after his death, and many herdsmen wished they had used him more. He is known for siring great females such as Bemindful Maid DHD 0807, the mother of DHD Traveler 6807; Dixie Erica of CH 1019, the mother of several grand Ohlde bulls, including OCC Emblazon 854E; Blackbird of RR 1204, mother of RR Hero 6267 and several top flight Ohlde bulls; and several other excellent females. He didn't disappoint with his sons, siring RR Rito Highroller 8025, RR Rito Highroller 9354 and Schearbrook Classic. **F0203** earned a progeny weaning ratio of 102 on nearly 1,100 head and a progeny yearling ratio of 103 on more than 600 head with nearly 400 daughters in the AHIR program who posted a collective progeny weaning ratio of 101. You must see his sons.

We used **Emulation N Bar 5522** because we have found that his offspring perform exceptionally well in the range environment. As Tom Burke pointed out in Angus Legends: “**5522** recorded a birth weight of 80 pounds, a 205-day weight of 623 pounds for a weaning ratio of 119, a 365-day weight of 1,196 pounds for a yearling ratio of 121. **5522** gained the reputation for transmitting outstanding udder quality, fertility, femininity and longevity.” His sons and daughters have performed well in our

herd.

N Bar Emulation EXT is the most widely-used bull of the breed, and lived to be 14. His sons are outstanding, and his daughters are superb. **EXT** has been widely used to improve teat and udder quality and assure range adaptability. He had a birth weight of 74 pounds, a 205-day weight of 550 pounds for a weaning ratio of 107, a 365-day weight of 1,008 for a yearling ratio of 105, and became a 2,400-pound mature bull.

Express 6V47 stamps his calves, and his females are just as good as his bulls, which are superb. At 10 years of age, he's still at the ranch, walking out to the hills every spring.

OCC Broadside and **OCC Eureka** add thickness, masculinity and spring of rib. As you've seen from previous sales, the Broadside/5522 cross is outstanding, and the Eureka calves have topped our sales.

The **Wye** bulls work very well in our environment. **Federal of Wye**, in our judgment, is the equal of his 7/8's brother **Lodge of Wye**. (We encourage you to come to the ranch to see the sons we're using. They're HUGE for our program.) **Alap** was the high seller at the Wye 2001 sale. A Columbus and Bear grandson, **Alap** may be the best bull bred at the Wye Plantation since the dispersal in the late 1970's. He and his sons will correct any udder. Contact had tremendous length and sold for \$115,500 at the 1978 Wye sale. Bear is a foundation sire for a noted Montana herd. Semen on these bulls is almost non-existent. We have found the Wye animals add tremendous carcass quality, especially when crossed with Rito and Emulation animals. (Many breeders believe that a Rito/Wye cross is the best.) We agree with Jim Lingle, the mastermind of Wye, that they are "practical animals for the practical" producer.

Ambush 2172 represents excellent Canadian genetics that works on the range. Amazingly, he produced 120,000 units of semen between 10 and 12 years of age. He weighed 74 pounds at birth (you can see a pattern here), had a 205-day weight of 705 pounds, and weighed 1,261 as a yearling. "He matured into a 2,167-pound bull with a 44-centimeter scrotal circumference." He was a most consistent sire with progeny ratios of 100 for birth and weaning on nearly 13,000 head and 100 for yearling on more than 8,600 head.

Our herd concentrates traditional Angus breeding of Emulation, Wye, Rito and Traveler. Emulation cattle provide unrivaled mothering ability, fertility, calving ease, superb teat and udder structure and survivability, adaptability and longevity in the ranch environment. Wye is original Aberdeen Angus. Wye animals are highly maternal, transmit calving ease, have excellent carcass quality and marble easily on grass. If you trace the lineage of today's outstanding herds, most have Wye in the pedigrees. Rito/Traveler transmits muscle, adds performance, helps carcass quality and provides gain. Using line breeding and these lines of Angus cattle, we produce outstanding animals.

These 86 Registered Black Angus two-year-old bulls embody Timeless Genetics for Today's Producer. We challenge you to find any other set of bulls that combines the best genetic traits of the Aberdeen Angus breed.

These bulls will thrive for you. Please come to sale, and see the difference!

HOPE TO SEE YOU ON SALE DAY.

HAVE A GREAT 2017
THANK YOU!

2017 ANGUS BULL SALE

Friday, February 3, 2017 • 1 p.m. CST
Burwell Livestock Market • Burwell, NE

LOCATION: Burwell Livestock Market, 401 S. 11th, Burwell, Nebraska. The Livestock Market is located in the southwest part of town, west of the water tower.

SALE TIME: 1 p.m. CST.
Free lunch to bidders, 11:30 A.M.

AUCTIONEER: Col. Mike Baxter

CONSULTANT: Ken Brubaker 540.908.5799

VIEWING: You can see the bulls on the ranch (directions at www.svr-angus.com), or one day prior to Sale Day at the Burwell Livestock Market. You can also view videos online at www.svr-angus.com or www.superiorlivestock.com. Our log in page for viewing and bidding is <http://www.superiorlivestock.com/production-event-detail?id=1787>. We elected not to include photos in the sale book, because the bulls are best viewed either in person or video.

HERD HEALTH: All bulls will have passed a breeding soundness examination and fertility test, administered by Dr. Chere Stephen, DVM, Sandhills Animal Health Center. All bulls were vaccinated with Pyramid 5 Presponse SQ, Vision 7 Somnus, and Poured. All are virgin bulls. Our entire cow herd is AM Free, NH Free and CA Free. Dr. Stephen will be present to provide health certificates for same day shipment.

SALE DAY PHONES:

Sale Barn: 308.346.4257

Ben: 402.382.8181

Todd Eberle (Sale Barn Mgr.) 308.870.1783

Col. Mike Baxter (Auctioneer) 402.394.5686

Drew Feller (Angus Assn.) 402.841.4215

Kristian Renner (Angus Assn.) 970.218.9208

Chris Beutler (Midwest Messenger) 402.380.8244

ONLINE BIDDING: As described on the next page, you may bid online through www.superiorlivestock.com. The specific link for SVR is <http://www.superiorlivestock.com/production-event-detail?id=1787>.

ABSENTEE BIDS: If you cannot be with us on Sale Day, and would like for us to place a bid, we will confidentially and honestly handle any bids for you. Please call any of us at the phone numbers listed above.

VOLUME DISCOUNT: SVR offers a \$100 discount on the third bull purchased at this sale by the same buyer, and \$100 off each additional bull purchased by the same buyer.

LOT NUMBERS: Sale book numbers for the bulls will correspond to ear tags and freeze brands. Sale order is catalog order.

DELIVERY: Free Delivery within 250 miles of SVR. Over 250 miles, SVR will help coordinate delivery to the nearest convenient sale barn facility possible for our trucker and you. Sales totaling \$5000 or more will have a maximum delivery charge of \$300 per head anywhere in the lower 48 states. Sales totaling less than \$5000 will be delivered at cost. Bulls picked up sale day will receive a \$50 discount. Call Ben at (402) 684-3308 if any questions.

GUARANTEE: SVR will guarantee breeding soundness for the first 90 days, unless injury or death is caused by the buyer's negligence or an Act of God, such as lightning. SVR must be notified promptly of the bull's breeding disability. SVR will work with the buyer and (i) replace the bull with a comparable animal if SVR has such an animal; or (ii) credit the buyer with the purchase price, less salvage value, at SVR's next sale.

RETAINING: 1/3 Revenue Sharing and semen and certificate interest in all bulls in the Sale Book. Buyer has full possession and full salvage value. Should SVR want to collect the bull at a later date, it will be at the buyer's convenience and at SVR's expense.

STORM DATE: We will work with the Burwell Livestock Market to announce on the radio whether the Sale has been cancelled because of a storm and a new sale date. We will also try to announce such event online and on [superiorlivestock.com](http://www.superiorlivestock.com).

TERMS AND CONDITIONS: Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). All cattle are the buyer's property and the buyer's responsibility as soon as the gavel falls. All purchases must be paid in full prior to load. Health papers will be the buyer's responsibility if the buyer does not take possession within thirty days.

LIABILITY: All persons attending the sale do so at their own risk. Neither SVR nor Burwell Livestock Market assume any liability, legal, at equity or otherwise, for any accident that may occur.

INSURANCE: Insurance will be available to buyers on sale day by James F. Bessler, Office: 630.945.3483, Cell: 816.762.2641, JamesFBessler.com.

MOTELS:

Pump and Pantry Motel, Burwell • 308.346.4607

Rodeo Inn, Burwell • 308.346.4408

**COMMENTS FROM THE SALE MANAGER:
SPRING VALLEY RANCH ANGUS -
THE MOTHER CHURCH OF REAL WORLD LOW INPUT ANGUS AT SEEDSTOCK**

Spring Valley Angus has one of the most unique programs of raising realistic, low input Angus seedstock to be found anywhere in the world.

At Spring Valley an abundance of forage and roughage is maintained and used on a daily basis for the cow herd as well as the development of the young cattle. In building the program at Spring Valley, only the best tried and proven genetics have been used from the standpoint of genetics and nutrition never has a shortcut been tolerated.

The bulls selling in this sale are as sound as can be, they are strong aged and ready for immediate service. Mark my words, this will be one of the most unique sets of Angus bulls that you have seen sell this spring from the standpoint of their durability and ability to gain weight and continue to grow while breeding cows.

I look forward to seeing you at this important Angus sale.

Sincerely,
Tom Burke

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

If you are unable to attend and want to bid on Sale Day, we have made arrangements for you to purchase the bulls through Superior Productions' "Call or Click-To-Bid" service. Please note that all of the lots in the sale will also be available for viewing online prior to Sale Day at www.superiorlivestock.com. Our specific sale page for bidding and viewing is <http://superiorlivestock.com/production-event-detail?id=1787>.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started, simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions, print the registration form, fill it out, sign it and fax the completed form to Superior Productions at (817) 378-3380. You can also mail the completed form to the address provided on the form. Upon receipt, Superior will call you with a buyer's number and the bid line phone number that you will use on Sale Day to place bids over the phone.

Click-To-Bid. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward, you just have to sign in, select our sale and register for it. Once approved, you will receive an e-mail confirming that you are registered for our sale. **Please note that high speed internet is required - this is not for dial-up or satellite internet.**

Viewing the Auction. The sale will be broadcast live on the internet at www.superiorclicktobid.com and www.superiorlivestock.com - just go to the home page and select the auction. Remember, you can call in to bid over the phone when watching on the internet if you have registered for that service. But, you must be a member of www.superiorclicktobid.com to "click-to-bid" and bid online.

Our specific sale page for bidding and viewing is <http://superiorlivestock.com/production-event-detail?id=1787>.

Bidders who are successful in making purchases will be contacted by Spring Valley Ranch after the sale to settle payment and discover your shipping plans.

HEIFER BULL We brought 6V47 into the program to keep the maternal goodness of Emulation while adding depth, growth, carcass, length and spring of rib. We wanted to breed Express, a son of A1747 and a grandson of EXT, with the excellent females sired by our herd sire Sinclair Bush Ranger 9X16 - a full brother to N Bar Shadow. 5125 proves the breeding of Express with Bush Ranger daughters works. 5125 is strengthened by his grandam, our foundation donor 784. The calving predictability is here, as Express King's mother has had her three calves within a ten-day window.

COW BULL prospect from a solid cow line that has been working at Spring Valley for quite a while. His mother is eight years old and will soon become a donor. His grandam is the exceptionally fertile 764 cow who is 13 years old. 5174's dam and both maternal and paternal grandams just weaned heifers into the replacement pen this fall. Given his pedigree and the performance of the females in his pedigree, he should stamp his calves.

HEIFER BULL Express Eric is a full brother to last year's sale feature 4116 bull sold to the Arabia Ranch. Every animal in his pedigree offers consistency. His full sisters all look the same. We calved two full sisters to this bull this spring and both did very well. They calved easily, got their babies going on the range, have good udders and great dispositions. 5165 is a maternal brother to two of our foundation herd sires - Coleman Rito 149-8253 and Coleman Great Plains 0251. His mother is one of Coleman Angus' foundation females.

This is a smooth shouldered, long spined, calving-ease **HEIFER BULL** who will make terrific, feminine, long-lived females and equally suitable bull calves. Several years ago, we purchased a flush of Sam Wylie's Octoraro Delia 151 cow and were able to pick the sire. We chose EXT because we thought he would cross well with the excellent Wye sire, Fabron. We are very pleased with this result. It's doubtful you'll find an EXT son out of a Fabron daughter anywhere else in the United States.

COW BULL Son of Rito F0203. 5108 is a maternal sibling to SVR Range Master 3247 who tied for high-selling bull in our 2015 sale and is an elite pasture sire at the Arabia Ranch. Henderson Ranch selected his full brother in last year's sale. His mother is one of our donors and front pasture cows, who just weaned another replacement heifer. She is a full sister-in-blood to our foundation herd sire BAX Embody 97-844. His full sisters are productive, long-spined, easy fleshing females.

A son of XXP, 5135 is a **HEIFER BULL** who will add length and structural correctness to a set of calves and make wedge shaped maternal females. We bred him to combine the A14 and 4908 donor cows from the N Bar. He is a maternal sib to our herd sire, SVR Cornerstone of Rose 1112. Because 5135 and Cornerstone have an extremely high relationship coefficient, 5135 should sire calves similar to the ones Cornerstone has in this sale. 5135 is a maternal sibling to SVR Revolution 3173 owned by Hyline Ranch.

HEIFER BULL prospect that will add production and longevity to any cowherd. 5144 is a genetic treasure of pure Wye breeding. His sire, Luthien of Wye, is a maternal grandson of the Wye Plantation's great Luria cow, who is in the pedigree of 5144 several times. Wye ranked its cows in part based upon the tonnage weaned by each cow. Luria finished second - because she produced only females. Luria weaned her 18th calf at 19 years of age. Wye has a Luthien son serving as a herd sire.

HEIFER BULL and female producing prospect. This mating has a 21.88% inbreeding coefficient to concentrate F0203 blood and bring F0203 forward in our program. F0203 is known industry wide and the 401 cow has produced both males and females that we have incorporated into our herd. 5105 is a flush brother to Lots 5118 and 5154.

HEIFER BULL prospect, full brother to last year's sale feature 4116 bull and flush brother to Lot 5165. Consistency is solid in this pedigree. We calved two full sisters to this bull this spring and both did very well calving and getting their babies going on the range. They have good udders, great dispositions, and were wonderful mothers. 5106 is also a maternal brother to two of our foundation herd sires - Coleman Rito 149-8253 and Coleman Great Plains 0251.

HEIFER BULL prospect. 5149 offers pure Wye genetics. His mother 9141 is a front pasture donor who is one of our best cows. His full brothers sold at Wye last spring as yearlings. Two of her sons are in the Cotton Angus herd, including one by Lodge of Wye, a 7/8's brother to 5149's sire, Federal. Another son of 9141, by Fabron of Wye, tied for higher seller in our 2015 sale and is working hard in Burkes Garden, Virginia. Don't miss this bull.
